- CDM Modalities and Procedures
- CDM Institutions and procedures – EB, Meth Panel
- How to identify and appraise CDM projects
- CDM requirements – project cycle, boundaries, baselines, public participation, architecture, DNA, additionality
- How to evaluate a project's contribution to SD
- Small scale project types

Overview cont...

- The relevance of the CDM to National circumstances and Priority Sectors
- Assessing Project Additionality
- Appraisal of Tanzania projects
- Assessment of Feasibility and Risks
- How to prepare project PIN

Objective of the 2nd Workshop

- The workshop will mainly concentrate on how to prepare PINs and PDDs
- The objectives are;
 - ✓ To search and present the baseline information in preparation of PINs and PDDs
 - ✓ To select the best methodologies for a particular potential project

Objectives cont...

- ✓ To enable the participants understand CDM investment analysis and legal issues
- ✓ To enable the participants prepare sample PINs and PDDs

Topics

- The topics to be discussed in the workshop will include;
- ✓ General guidelines for PIN and PDD preparation
- ✓ Tanzania case study and CDM projects
- ✓ Review of the CDM project cycle

Topics cont...

- ✓ Sustainable development impacts and evaluation
- ✓ Introduction to CDM legal issues, investment analysis
- ✓ Sensitivity analysis for CERs impact on project economics
- ✓ Status of global carbon market and types of emission reduction purchase programs/agreements

Expected outcome

- At the end of the workshop, participants can be able to;
 - ✓ Understand PINs and PDDs preparations
 - ✓ Identify the potential project areas

Expected outcome..

- ✓ Collaborate with project developers and the government in project preparation and implementation of CDM projects e.g. industries
- ✓ Invest in CDM projects e.g. banks and other financial institutions
- ✓ Participate in global carbon market expo for business opportunities e.g. the Cologne annual carbon expo.

Expected outcome

- ✓ Knowledge and experience sharing amongst the participants
- ✓ Identified possible projects

Conclusion

- CD4CDM workshops aims at creating awareness, training and sharing information and knowledge with all the stakeholders.
- Expectations include understanding of CDM and its benefits
- Acquire knowledge for preparation and dissemination of CDM projects
- Sharing and dissemination of the acquired knowledge

Thank you
